PROFESSIONAL SUMMARY

MERN Stack Developer specializing in building scalable full-stack web applications using Next.js, React.js, Node.js, Express.js, TypeScript and MongoDB. Experienced in developing RESTful APIs, implementing secure authentication and role-based access control, and integrating third-party services. Passionate about backend development, system design, and building scalable, maintainable web applications.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, Mongoose, Redis

Authentication: JWT, Google OAuth, bcrypt

Tools: Git, GitHub, Docker, Postman, npm

Integrations: Cloudinary, Stripe, Gemini API, n8n

EDUCATION

Bachelor of Computer Applications (BCA)

2022 – 2025

College of Applied Science, IHRD, Kozhikode

- Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, OOP, Computer Networks

Higher Secondary (Class XII)

2020 – 2022

S.N Trust HSS, Chelannur

- Scored 89% in Commerce stream with Computer Applications focus

Experience

Limizny Technologies Pvt. Ltd. | Government Cyberpark, Kozhikode

April 2026 – July 2026

MERN Stack Developer Intern

- Developed a full-stack web application using the MERN Stack, Next.js, and TypeScript.
- Designed and developed RESTful APIs, database schemas, and CRUD operations using Express.js, MongoDB, and Mongoose.
- Implemented secure authentication and authorization using JWT (Access & Refresh Tokens), Google OAuth, and role-based access control.
- Integrated Cloudinary for media management, Stripe for payment processing, and n8n for workflow automation.
- Developed automated email workflows and scheduled background tasks using n8n.
- Worked under the mentorship of experienced software developers while contributing to feature development and application improvements.
- Used Git and GitHub for source code management and version control throughout the development lifecycle.

PROJECTS

Job Application Tracker | Next.js, React, Node.js, Express.js, TypeScript, MongoDB, n8n | [Live](#) | [GitHub](#)

- Developed a full-stack recruitment platform supporting Candidate, Company, and Admin roles with secure authentication and role-based access control.
- Integrated the Gemini API to build AI-powered candidate analysis and recruiter screening, providing JD-to-resume matching, candidate scoring, skill gap analysis, resume evaluation, personalized recommendations, and recruiter insights.
- Integrated n8n as a workflow automation layer to manage transactional emails and scheduled background jobs independently from the backend business logic.
- Built features including job posting, application tracking, personalized job alerts, subscriptions, notifications, Cloudinary integration, Stripe payments, and responsive dashboards.

Weather Analytics Dashboard | React, Node.js, Express, Redis | [Live](#) | [GitHub](#)

- Built a full-stack weather dashboard where users can search cities and view real-time conditions, 24-hour forecasts, and 7-day trends with interactive charts.
- Developed an Express backend with Redis caching and rate limiting to reduce repeated API calls and protect against abuse.
- Managed global state with Redux Toolkit for city preferences and unit toggling across the app.

Food Delivery App | MongoDB, Express, React, Node.js | [Live](#) | [GitHub](#)

- Built a full-stack food ordering app where users can browse menus, manage a cart, and place orders with a secure login system and order history tracking.
- Implemented dual-token JWT authentication (access + refresh tokens) with forgot password and email-based reset flow using Nodemailer.
- Integrated Cloudinary and Multer for cloud image uploads, and enforced input validation using Joi and express-validator.
- Containerized the full application using Docker and Docker Compose, ensuring a consistent development environment.
